PROFESSIONAL SUMMARY

Software Engineer with hands-on experience in software development, maintenance, and optimization across production projects. Solid understanding of programming concepts, object-oriented design, data structures & algorithms, and software development principles. Proven ability to apply scientific, structured problem-solving to engineering challenges, work with minimal supervision, and collaborate effectively with cross-functional, distributed teams to deliver accurate and reliable results.

TECHNICAL SKILLS

Languages: Python, C, JavaScript, HTML, CSS

Software Engineering: Data Structures, Algorithms, OOP, Software Design, Software Development Principles, REST API Design, Debugging & Maintenance

Databases: SQL, PostgreSQL, MongoDB

AI/ML: Machine Learning, Deep Learning, Computer Vision, Data Analytics

Tools & Practices: Git, GitHub, Docker, CI/CD Basics, Agile Collaboration, Code Review

SOFTWARE ENGINEERING EXPERIENCE

Software Engineer Intern — Shnoor International LLC (Remote)

Mar 2026 – Jun 2026

- Applied software engineering practices to develop, maintain, and optimize REST APIs and database functionality across four production applications: a Search Engine, Job Portal, Import-Export System, and Email-HRMS platform.
- Exercised independent judgement to design backend logic for data storage, retrieval, and validation using SQL and MongoDB, consistently delivering accurate, reliable results with minimal supervision.
- Collaborated as a team player with a distributed development team using Git and GitHub for version control, code review, and issue resolution, directly improving project reliability.
- Organized own workload against sprint-based tasks and mid-term delivery timelines set by the team lead.

PROJECTS

Fake Logo Detection — Python, OpenCV, Machine Learning

Jan 2024 – Apr 2024

- Applied scientific, structured problem-solving methods to design and develop an image classification system for detecting counterfeit brand logos.
- Preprocessed and augmented image datasets, then engineered features to support model design and evaluation.

Facial Expression Recognition — Python, OpenCV, Machine Learning

Jun 2025 – Dec 2025

- Designed and built a facial expression recognition pipeline using computer vision and image processing techniques.
- Extracted features and applied machine learning models for multi-class classification, iterating on software design to improve accuracy.

AI in Manufacturing — Python, Machine Learning, Data Analytics

Jun 2025 – May 2026

- Developed and maintained an AI-based data analysis system to support manufacturing decision-making.
- Applied predictive analytics techniques and produced data-driven reports to improve operational efficiency.

EDUCATION

B.Tech, Computer Science and Engineering — Sri Indu Institute of Engineering and Technology, Hyderabad 2022 – 2026

CGPA: 8.3 / 10

Intermediate (MPC) — TSWRS(G) Residential College, Wanaparthy

2020 – 2022

79%

SSC — Government Practising High School, Gadwal

2016 – 2020

CGPA: 10 / 10

CERTIFICATIONS

- Technology & Consulting Job Simulation — Deloitte | 2024
- AWS – Amazon Web Services (AWS) | 2024
- JavaScript Essentials — Preplnsta | 2025
- Git & GitHub — Coursera | 2025
- SQL — Preplnsta | 2025
